

contents in detail

acknowledgments	xii
------------------------------	------------

1	
getting started	1
what's in the box?.....	1
the hub	1
the motors and sensors.....	1
the app	2
using this book.....	2
conclusion.....	2

2	
baseball batter	3
building the baseball batter.....	4
programming the batter.....	6
getting around the app.....	6
creating a program from scratch.....	7
saving and running the program.....	10
understanding the program.....	12
what you've learned.....	12

3	
the gobbler	13
building the gobbler.....	14
programming the gobbler.....	27
creating the base program.....	27
understanding the base program.....	27
improving the base program.....	29
understanding the enhanced program.....	29
making the gobbler answer questions.....	31
what you've learned.....	33

4	
SARKIAP-1 the transformer	35
building the walking core robot.....	36
programming the walking core robot.....	48
custom blocks.....	49
understanding the walking core program.....	51
moving the robot torso up.....	66
finishing the transformer.....	67

creating a custom remote-control interface	83
reacting to remote-control inputs.....	86
reading the orientation of the hub in space.....	87
starting multiple stacks running together.....	87
programming the transformer	87
become biped and become car custom blocks	88
custom blocks to make the robot walk and turn	89
car RC and biped RC custom blocks.....	89
program stacks that manage the widgets events	90
what you've learned.....	91
5	
shelly the turtle	93
building the turtle.....	94
programming the turtle.....	115
creating custom patterns on the Hub display	117
creating complex logic conditions.....	117
understanding the blocks to walk and move the head.....	117
using the timer.....	117
creating more interesting behavior	118
using variables	118
understanding the advanced program	119
what you've learned.....	122
6	
whac-a-mole!	123
building the whac-a-mole game	124
programming the whac-a-mole game	134
playing the game	134
understanding the main stack	136
understanding the move up and move down blocks	136
understanding the game logic	136
what you've learned.....	138
7	
pinball.....	139
building pinball (part 1).....	140
using lists.....	164
controlling the hub display with text strings.....	165
making the base pinball program	166
playing the game	168
understanding the base program	168
finishing pinball.....	169
controlling the distance sensor lights with text strings.....	179
enhancing the pinball program.....	179
programming the bumpers	179
earning extra balls	180
adding an anti-tilt system.....	181
what you've learned.....	182

8		
guitar	183	
building the guitar	184	
playing solos	200	
creating the program	200	
playing the guitar	202	
understanding the guitar solo program	202	
playing chords	205	
creating the program	206	
playing famous songs on the guitar	206	
understanding the guitar chords program	207	
adding the control knobs	209	
adding transposition control to the solo program	212	
adding transposition and tempo control to the chords program	212	
playing further	212	
what you've learned	213	
9		
where to go from here	215	
expanding the software	215	
expanding the hardware	216	
be social	216	
what's next?	216	
A		
word blocks quick reference guide	217	
motors	218	
movement	219	
light	220	
sound	221	
events	222	
control	223	
sensors	224	
operators	225	
remote control	227	
variables	228	
more movement (extension)	229	
more motors (extension)	230	
index	231
